Decking & Cladding Teak Alternatives

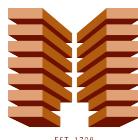

Teak Tradewinds, a member of the Alpha family of finished products, showcases the sought-after Teak look in a variety of alternative species. With increasing difficulty in sourcing Myanmar Teak, our Teak Tradewinds line offers the opportunity to trade up to alternatives that are widely available and sustainably sourced from day one. We have even included FSC Plantation Teak that showcases a higher grade than typical plantation offerings due to our increased quality control and sourcing standards.

With several species represented, each product in the Teak Tradewinds line has a one of a kind appearance. Each one represents the Teak aesthetic, but the subtle differences in color and grain offer variety that ensures you'll find one that integrates seamlessly into your design.

If you're ready to trade up to Teak Tradewinds, reach out to request a quote or sample via our website!
