

Kitchen Cabinets

Every project is unique. We have the expertise to engineer the right solution for yours.

Precision Isn't Optional. It's an Obsession

For 67 years, ICD has been driven by an obsession with perfecting fit and finish across every millwork product we build. From the start our process has been centered on installation—carefully engineering each piece for strength, beauty, precision, and seamless installation.

Custom drawer layouts to maximize any space

Standard hidden hinges for clean aesthetic

Experienced Finishing Team Across Species and Styles

Custom hardware for ease of use

More than just modular boxes

"Custom cabinets" has becomes an umbrella term in today's market. Most of the time competitors are really referring to modular boxes that are used to fill a space. At ICD we will create a fully unique solution to maximize the storage efficency of your space with out compromise of aestetic or ease of use.

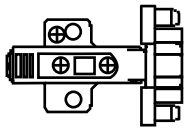

Completely Optimized For Your Space

From the very beginning ICD has function in mind. When designing all of our cabents. Constantly looking and planning for the most optimal use of space. For example many cabentry manufactuers leave space beneath sinks as open spaces where we regulary design drawers that account for plumming fixtures. Now you have a more functional storage space that is much easier to use.

Since 1959, ICD has been obsessed with creating truly custom architectural millwork for high-end residential projects

Hinge Options

Our standard hinge option is a European style hinge. This allows for a clean clear face aestetic.
