

Rafter Tails

Every project is unique. We have the expertise to engineer the right solution for yours.

Precision Isn't Optional. It's an Obsession

For 67 years, ICD has been driven by an obsession with perfecting fit and finish across every millwork product we build. From the start our process has been centered on installation—carefully engineering each piece for strength, beauty, precision, and seamless installation.

Simple to ornate designs

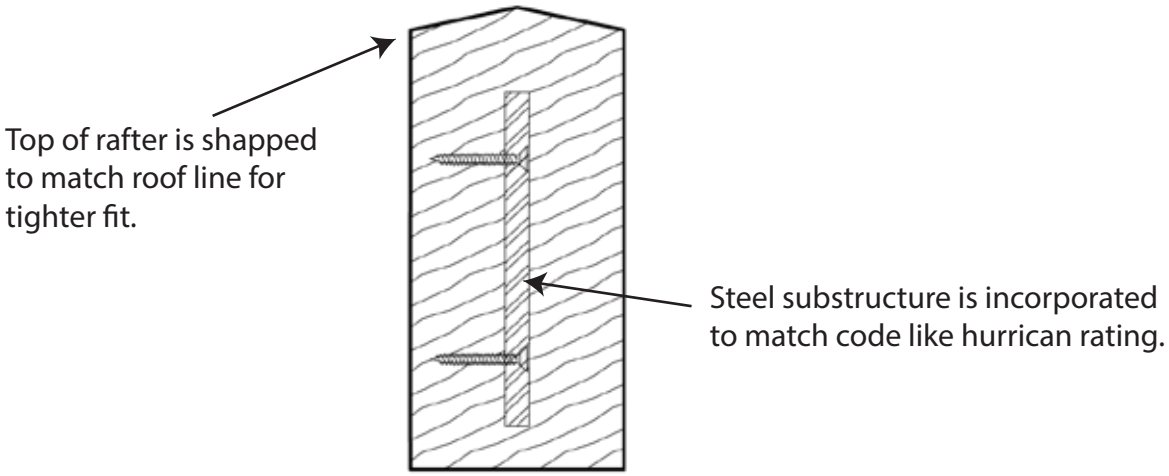

Combination of CNC Tech and craftsmanship

Experienced Finishing Team Across Species and Styles

What sets our rafter tails apart?

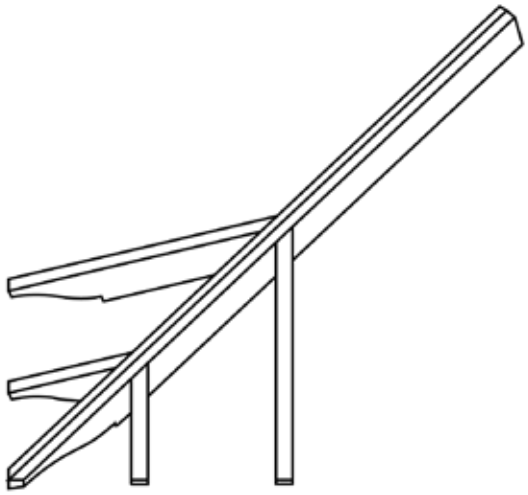

- ICD has the ability to incorproate steel into the design to fit project needs
- We match the geometry of the roof line so the rafter tail can fit nicely against the bottom of the roof
- Our team engineers each corner rafter tail for precise alignment with the surrounding rafter tails, maintaining a clean, consistent profile across the structure.
- ICD can review your design and make suggestions to optimize value engineering as well as streamline the manufacturing of the rafter tail

Since 1959, ICD has been obsessed with creating truly custom architectural millwork for high-end residential projects

How custom can ICD get?

In combination with CNC technology as well as good old fashion craftmenship ICD is capable of matching historic profiles, as well as creating custome rafter tails as simple as a 45 degree cut, to a complete orinate design

Finishing Options

Every custom Rafter tail deserves a finish that completements its craftsmanship. Through careful sampling and attention to detail, we enhance the wood's natural beauty and create a final appearance that seamlessly integrates with your home's architecture

Make it the easiest next step possible

Tell us about your gates project and requirements, and we'll recommend the best building solution.
